How can we do without Instagram photos? I think that you can not do without it.

What about showing your vacation photos to your friends? Without this, guys, we can't survive!

So we will need our screenshots from the places we visited. Alas, there is no place on Instagram without photoshop, it will also be useful for us, make your group photo and insert yourself on the skinshots that you have done.

How?

Two truths, one lie

That's the end of our
mini journey.

But just telling your friends about emotions is not very interesting, friends may start yawning. Show the photos you have taken at the sights in turn and name 2 true interesting facts about this place and 1 slightly changed one. The other group needs to guess where the truth is and where the lie is.
